

Muhammed Shahad K

React Developer — Frontend Specialist — Full-Stack Web Developer

+91 7902927594 — mshahad@gmail.com — India
 muhammed-shahad —  shahadkgm

Profile

React Developer specializing in building responsive, scalable web applications using React.js, TypeScript, Redux, and Tailwind CSS. Experienced in integrating REST APIs and developing reusable UI components with a focus on performance and maintainability. Proficient in full-stack architecture using Node.js, Express.js, MongoDB, Socket.io, AWS S3, and modern frontend optimization techniques.

Skills

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3, Vite, Babel
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Socket.io, InversifyJS
- **Database:** MongoDB, SQL
- **Cloud & Services:** AWS S3, Stripe, Razorpay, PayPal, Google Generative AI
- **Tools:** Git, GitHub, VS Code, Postman
- **Core Strengths:** Component Architecture, Performance Optimization, Clean Code, Problem Solving, Debugging

Projects

TripBuddy

Personal Project
2025 – Present

- **Developed** a full-stack travel platform using MERN Stack, TypeScript, React.js, Node.js, Express.js, and MongoDB.
- **Architected** the backend using InversifyJS dependency injection and clean architecture principles for scalability and maintainability.
- **Implemented** JWT authentication, role-based authorization, and KYC verification workflows.
- **Built** AI-powered trip recommendation features using Google Generative AI.
- **Developed** real-time group chat and notification systems using Socket.io.
- **Created** collaborative itinerary planning, find-a-buddy matching, and guide hiring functionalities.
- **Integrated** Stripe payment processing and automated group expense-splitting features.
- **Implemented** interactive maps with Leaflet, live weather updates, media galleries, and AWS S3 file storage.

Student Management System

Personal Project
Jan 2024 – Jun 2024

- **Engineered** a full-stack application using React, Redux, Node.js, Express.js, and MongoDB.
- **Implemented** secure JWT authentication and role-based access control.
- **Designed** responsive UI components using Tailwind CSS.
- **Optimized** performance, reducing load time by 20%.

E-commerce Platform

Personal Project

- **Developed** cart, order management, and checkout workflow.
- **Integrated** PayPal, Razorpay, and Stripe payment gateways.
- **Implemented** authentication, authorization, and secure checkout flows.

Blog Application

Personal Project

- **Built** a full CRUD blogging platform using Express.js and MongoDB.
- **Implemented** authentication, role-based authorization, and content management features.

Education & Training

B.Com in Computer Application University of Calicut, India	2020 – 2024
Advanced Full-Stack Development Program	2024 – 2026
○ Completed industry-focused training with real-world full-stack projects. ○ Participated in weekly professional code reviews and collaborative development exercises. ○ Deployed production-ready services using AWS S3 and integrated third-party APIs for payments, maps, and weather data. ○ Built scalable MERN stack applications using modern development practices.
